# Engineering for Life

Research that makes the world a better place

Engineering for Life is an interdisciplinary approach that leverages engineering principles and harnesses cutting-edge research with a focus on four key areas that tackle the world's biggest challenges.

Planetary Health

Nature Climate Change

Nature Sustainability

Nature Water

Nature Reviews Earth & Environment

Nature Cities

7,811 articles

550k citations

29m downloads

35m denials

Clean Energy

Nature Reviews Clean Technology

Nature Energy

Nature Catalysis

Nature Chemical Engineering

Nature Materials

7,811 articles

550k citations

29m downloads

35m denials

Healthy Populations

Nature Biomedical Engineering

Nature Reviews Bioengineering

Nature Cardiovascular Research

Nature Health

Nature Biotechnology

20,348 articles

1.6m citations

91m downloads

30m denials

Intelligent Systems

Nature Machine Intelligence

Nature Computational science

Nature Electronics

Nature Reviews Electrical Engineering

Nature Nanotechnology

8,885 articles

1m citations

57m downloads

25m denials
